

RM15.1 BILLION TO KEEP THE LIGHTS ON IN 2016

120,059 GWh was generated in 2016 to meet the electricity demand of 9.2 million customers in Peninsular Malaysia, Sabah and Labuan. In line with the economic growth, we foresee this demand will be on the rise to meet the thriving industries and business needs of the Nation. Hence, there is a need for consumers to know the fuel mix and cost factors involved to understand why power must be used efficiently.
