SE monitoring power supply in flood-hit areas

KOTA KINABALU: Sabah Electricity (SE) will carry out continuous monitoring of the electricity supply in flood-affected areas to ensure proper and safe operation of the system, said its Chief Operating Officer Mohd Yusmanizam Mohd Yusof.

He said a technical team had been placed on 24-hour standby to repair any damage in the flood-hit districts of Kota Marudu, Telupid, Lahad Datu, Pitas, Kota Belud, Beluran, Sandakan, Paitan, Beaufort and Tongod.

“The measure also includes the provision of mobile generator sets, which will be placed in strategic locations,” he said in a statement.
