> Keeping electricity bills low

PM Datuk Seri Ismail Sabri Yaakob has said that there will not be an increase in electricity tariffs for domestic consumers ("New chicken ceiling price, no utility hike", *The Star*, June 25; online at bit.ly/star_utility). However, consumers should still strive to use electricity efficiently to keep energy use low and save the planet. Simple methods include unplugging appliances and gadgets when not in use, switching to energy-saving LED lights, doing only full loads of laundry, and using natural light as much as possible during the daytime. – Bulbir Singh, Seremban
