Samaiden receives FiT approval for biomass power plant in Johor

PETALING JAYA: Samaiden Group Berhad (Samaiden), a renewable energy (RE) specialist principally involved in engineering, procurement, construction, and commissioning (EPCC) of solar photovoltaic (PV) systems and power plants, is delighted to announce a significant milestone achieved by Samaiden's indirect wholly-owned subsidiary, Samaiden Biomass Energy Sdn Bhd (Samaiden Biomass Energy).

For information, Samaiden Biomass Energy has received the Feed-in Tariff (FiT) Approval Certificate from the Sustainable Energy Development Authority (SEDA) Malaysia, marking a pivotal step in the Group's RE journey.

This approval, detailed in a letter dated January 22, 2024, authorises Samaiden Biomass Energy to construct and operate a Biomass Power Plant with an installed capacity of 7.0 Megawatts (MW).

The plant is set to supply a Net Export Capacity of 6.0 MW to Tenaga Nasional Berhad. This agreement spans twenty-one (21) years and is scheduled to commence on 22 January 2027.

The Biomass Power Plant, destined for Kampung Tanjong Batu 15 in Tangkak, Johor Darul Takzim, represents a strategic expansion of Samaiden's portfolio in RE.

This new development not only strengthens Samaiden's commitment to sustainable energy production but also aligns with Malaysia's broader goals for environmental sustainability and energy diversification.

Group managing director of Samaiden, Chow Pui Hee expressed her enthusiasm, "This FiT approval is a testament to our team's dedication and

This FIT approval is a testament to our team's dedication and expertise in the RE sector. Our new Biomass Power Plant in Johor is a key component of our strategy to enhance Malaysia's RE capacity, said Chow.

expertise in the RE sector.

"Our new Biomass Power Plant in Johor is a key component of our strategy to enhance Malaysia's RE capacity.

"This project not only signifies our growth but also our contribution to the nation's commitment to a sustainable energy future."

Samaiden continues to lead the way in RE, focusing on innovative solutions that contribute to the nation's energy sustainability and environmental stewardship. This latest venture in Johor is a significant step towards realising these goals.
