## TNB capable of driving national energy transition efforts: PM

**KUALA LUMPUR:** Prime Minister Datuk Seri Anwar Ibrahim has expressed confidence in the ability of national power company Tenaga Nasional Bhd to lead energy transition efforts as well as support the rapid growth of artificial intelligence (AI) and digital infrastructure investments in the country.

Anwar, who is also Finance minister, said the country's strategic location and competitive investment environment have also enabled Malaysia to emerge as a key destination in the global digital infrastructure race.

"We continue to attract major data centre investments, particularly in Johor and Sarawak.

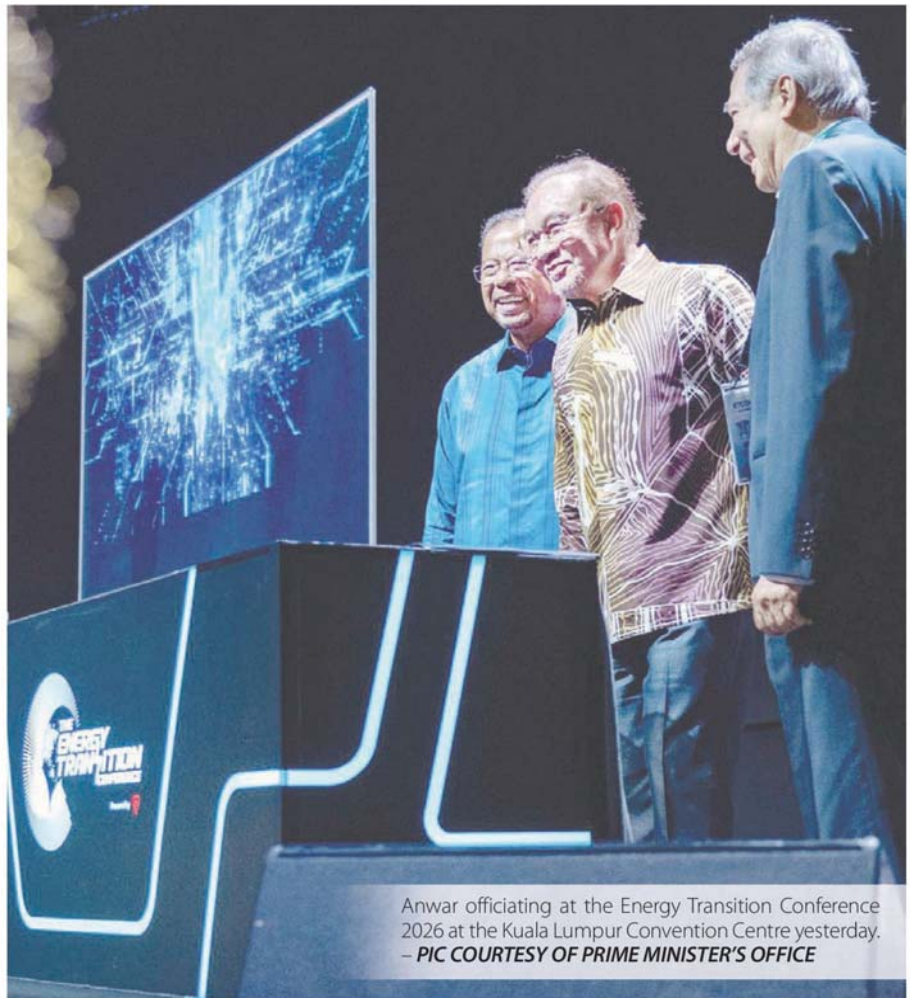

"This raises the stakes. But in this regard, I have full confidence in TNB's ability to guide our energy transition and to deliver on the promises of AI and energy," he said at the Energy Transition Conference 2026 yesterday.

Anwar also gave an assurance that energy transition would be just, secure and AI-driven in the interest of the nation.

"That is, and must continue to be, the measure of this work."

He commended TNB for again convening the conference to foster discussions, deliberations and critical dialogue on the energy transition agenda.

The conference, being held from June 3 to 5, brings together global stakeholders to accelerate the implementation of the national energy transition agenda and serve as a platform for policymakers, technology experts, investors, academics and industry stakeholders from more than 60 countries, with 4,000 delegates participating. – Bernama
