COMPANIES FINED FOR NOT MEETING SPECS

KUALA TERENGGANU: Two construction companies were each fined RM60,000 by the sessions court yesterday on four counts of building septic tanks and sewerage systems that did not meet the National Water Service Commission (Span) specifications. Judge Jamaludin Mat meted out the fine against LLC Infra Sdn Bhd and Sinohydro Corporation (M) Sdn Bhd after their directors, Loh Choon Quan and He Feng, respectively, pleaded guilty to the charges. Jamaludin fined both the companies RM15,000 for each count and ordered them to make the necessary changes to the septic tanks and sewerage systems, which were built at the Terengganu Power Station in Kuala Berang. The two companies are the main contractors appointed by Tenaga Nasional Berhad for the Hulu Terengganu Hydroelectric Project. – Bernama
