Stable power supply even during pandemic

DUNGUN: Tenaga Nasional Berhad (TNB) senior technician Mohd Fairrunizan Husin (right) and assistant technician Mohd Faizol Abdul Rahman from the Grid Division are hard at work carrying out their responsibilities despite having to climb a height of more than 30m at the transmission tower here in Terengganu.

Fairrunizan conducted a Tower Top inspection on the 132kV high-voltage transmission line during the period of the Enhanced Movement Control Order.

TNB has always been committed to ensuring the stability and reliability of electricity supply, especially during the country's efforts to combat the Covid-19 pandemic.
