ENSURING STABLE SUPPLY: Tenaga Nasional Bhd (TNB) reliability engineer Muhammad Ab Halim (in orange shirt) and boiler engineer Mohd Faris Kadir diligently conducting a visual inspection of the boiler tubes during the shutdown of Unit 2 at the Tuanku Muhriz Power Station in Port Dickson, Negri Sembilan. As the nation's electric utility company, TNB continues to deliver the best services throughout the implementation of the latest Movement Control Order by ensuring electricity supply remains stable and reliable. At the forefront, almost half of TNB's 35,000 employees, including technical employees of TNB Power Generation Sdn Bhd, continue to work hard to ensure that 9.5m customers receive uninterrupted services.
