G Capital's unit signs renewable energy power purchase deal with TNB

KUALA LUMPUR (Nov 14): G Capital Bhd has entered into a 21-year renewable energy power purchase agreement (Reppa) with Tenaga Nasional Bhd (TNB). According to its filing with Bursa Malaysia, the Reppa was inked via G Capital's 74.64%-owned subsidiary Hydro R E Sdn Bhd (KHRE). Under the deal, TNB will buy electricity from KHRE at a feed-in-tariff (FiT) rate of 24.61 sen per kilowatt hour. The Reppa's tenure will start from the commercial operation date, which is scheduled to be May 11, 2027. The announcement came after KHRE was granted in May this year the feed-in approval by the Sustainable Energy Development Authority Malaysia for a two-megawatt high-head mini hydro water plant in Sungai Geroh, Perak. — *by Justin Lim*
