TENAGA Nasional Bhd's (TNB) wholly owned subsidiary, TNB Repair and Maintenance Sdn Bhd (TNB Remaco), has secured a

seven-year contract from Kuwait's Ministry of Electricity, Water and Renewable Energy for the maintenance, repair and overhaul of the Sabiya Power Generations and Water Distilled Plant for RM705 million. Located 65km from Kuwait City, the plant has a total gen-

eration capacity of 299.4 megawatts across four oil- and gas-powered units and plays a crucial role in Kuwait's energy infrastructure. TNB president and chief executive officer Datuk Megat Jalaluddin Megat Hassan said the agreement reflected the ministry's confidence in the TNB Remaco-Al Dhow joint venture to deliver high-quality and sustainable energy solutions, supporting Kuwait's growing power de-

mand. "This contract aligns with TNB's mission to be a leading provider of sustainable energy solutions in Malaysia and internationally. Beyond Kuwait, our global footprint extends to the United Kingdom, Ireland, Australia, Turkiye, Saudi Arabia, Pakistan and Cambodia. "This partnership reinforces our technical expertise and strengthens economic ties between Malaysia and Kuwait."

TNB Power Generation Sdn Bhd managing director and TNB Remaco chairman Datuk Muhamad Nazri Pazil said TNB Remaco had significantly expanded its business since entering Kuwait's power generation market in 2013. "We manage 11 projects with a total contract value exceeding RM4.54 billion." The signing ceremony was held at the National Bank of Kuwait Head Office on Saturday.
