> **Green energy**

Reference to "Solar way for electricity" (*The Star*, May 16), I say consumers, especially those who pay more than RM400 monthly for their electricity bill, should learn to harness free energy from the sun. Also, solar energy is green and would reduce emission of greenhouse gases. – Bulbir Singh

Thank you to Dr Mohamed Awang Lah for his views on harnessing the energy of the sun, "Solar way for electricity". Just to add that a prohibitive factor is the expensive cost of solar panels. Is there a quota for TNB's net energy metering (NEM) programme? – Marina
