Southern Cable secures contracts worth RM403 million from TNB

KEDAH: Cable and wire manufacturer Southern Cable Group Bhd secured supply contracts totalling RM403.6 million from Tenaga Nasional Bhd (TNB).
The contracts, awarded to the group's wholly-owned subsidiary, Southern Cable Sdn Bhd, entail the supply and delivery of underground

power cables and conductors to TNB's Distribution Network Division for a one-year term commencing this month.
Southern Cable Group Bhd managing director Tung Eng Hai said: "The contracts from TNB demonstrate their continual confidence in Southern Cable's ability to deliver high-quality products vital to Malaysia's critical

power infrastructure.
"We are committed to supporting TNB's efforts to strengthen the power grid and meet the nation's growing energy demands, driven by increasing construction and infrastructure developments."
To meet rising demand, he added they are focused on expanding their

production capacity and enhancing their product range, particularly for the medium- and high-voltage cables essential for new substations and infrastructure projects.
Looking ahead, Tung said they are confident in delivering strong performance for the financial year ending Dec 31, 2025, supported by robust orders

and Malaysia's development activities.
TNB has the option to extend the agreements for another year with add-on orders of the original contracts value. Furthermore, TNB may exercise its option to request additional orders up to 30% of the original contracts value, further boosting the potential revenue from these agreements.
