'85pc not affected by new power tariffs'

THE government reaffirms that 85 per cent of electricity users in Peninsular Malaysia will not be affected by the revised tariff structure since July 1. Energy Transition and Water Transformation Minister Datuk Seri Fadillah Yusof said most domestic users and micro, small and medium enterprises would keep receiving rebates. "Only 15 per cent of users will experience adjustments. Some may see slight increases, while others may even see reductions, regardless of their sector," he said during the question-and-answer session yesterday.
