Malaysia committed to achieve net zero carbon by 2050 — Anwar

KUALA LUMPUR: Prime Minister Datuk Seri Anwar Ibrahim has reiterated Malaysia's commitment to reduce carbon intensity by 45 per cent by 2030 and achieve net zero carbon by 2050.

He said the goal is supported by strong policies including the National Climate Change Policy (DPIN) 2.0, the National Energy Transition Roadmap (NETR) as well as the implementation of a carbon tax starting next year.

"Last night I joined 16 other

Heads of State/Government in a virtual dialogue chaired by UN Secretary-General Antonio Guterres and Brazilian President Luiz Inacio Lula da Silva in preparation for #COP30 (30th Conference of the Parties).

"We exchanged views and best practices in addressing climate change while discussing related issues including preparations for the upcoming Nationally Determined Contribution (NDC) target setting," he said in a Facebook post. — Bernama
