M'sia supports ASEAN's efforts to strengthen regional energy security

KUALA LUMPUR: Malaysia supports ASEAN's efforts to strengthen regional energy security following geopolitical uncertainties in West Asia that could potentially disrupt energy supply, Deputy Prime Minister Datuk Seri Fadillah Yusof said.

The matter was discussed during the Special ASEAN Energy Ministers' Meeting held virtually on Monday, focusing on the implications of the current situation in West Asia on energy stability in the region, he added.

"Malaysia fully supports

ASEAN's efforts to strengthen existing mechanisms, expand expertise-sharing and coordinate response measures in facing any disruptions arising from geopolitical uncertainties," he posted on Facebook on Monday. — Bernama
