Energy giant launches three-pronged campaign to enhance its integrity

TENAGA Nasional Berhad (TNB) has launched three initiatives to further establish the company's integrity, which encompasses the management system, policy and upgraded vendors' Integrity Pacts.

"These efforts can increase the company's integrity level, and at the same time, boost the confidence of investors and important stakeholder in TNB," said TNB chairman Tan Sri Leo Moggie.

Officiating the launch of all three initiatives in conjunction with TNB Integrity Day 2017, he added that the concept of integrity covers a wider scope aside from preventing corruption, misappropriation and abuse of power.

He also said firmly that besides moral values such as trustworthiness, honesty, loyalty and holding firm onto principles, integrity

also urges each individual to prioritise the interest of the organisation and the general public, over and above self-interest.

"Instilling the value of integrity within TNB culture will directly create a huge impact on increasing the effectiveness and efficiency of the company's delivery system and productivity," Moggie added.

During the ceremony, five companies signed the Integrity Pacts with TNB.

The five companies – both Malaysian multinationals and conglomerates – were among the earliest vendors which signed the updated Integrity Pacts.

Also present at the ceremony were TNB president and chief executive officer Datuk Seri Azman Mohd and the management team as well as TNB staff.
