Moscow to help in nuclear energy development

The Sun, Malaysia

Moscow to help in nuclear energy development

MOSCOW: Russia has agreed to continue cooperating with Malaysia in nuclear energy development, covering institutional, human capital, technical, commercial and legal aspects, said Deputy Prime Minister Fadillah Yusof.

Speaking at a media conference after concluding his four-day working visit to Russia on Friday, he said one of the main objectives of the trip was to strengthen energy cooperation between the two countries.

He said in addition to existing cooperation in coal imports, he and Russian Deputy Prime Minister Alexey Overchuk discussed the potential for collaboration in

the field of nuclear energy.
"Russia possesses advanced technology in the peaceful use

Russia's experience could support nation's aspirations under the National Energy Transition Roadmap, says DPM

of nuclear energy. The country's experience in nuclear energy technology could support Malaysia's aspirations under the National Energy

Transition Roadmap."
Fadillah, who is also the
Energy Transition and Water Energy Transition and Water Transformation minister, said Russia's extensive experience in nuclear energy should be considered as Malaysia looks to enhance its future energy security, Bernama reported.

He also held a meeting on Friday with Russian state nuclear firm Rosatom's director-general Alexey

director-general Alexey

Likhachev, discussions covered technical and operational matters, including legal frameworks, technology transfer and workforce training.

He added that the meeting opened the door for direct dialogue between Malaysia's technical agencies and Recatom to assess potential

dialogue between Malaysia's technical agencies and Rosatom to assess potential areas of nuclear cooperation, including the strengthening and modernisation of the power grid, which would in turn have a positive impact on Assan Power Grid cooperation

Asean Power Grid cooperation. Fadillah said the Cabinet

had, in principle, approved the consideration of nuclear

consideration of nuclear energy as part of Malaysia's future energy mix. "This is to address the current limitations in baseload energy supply. We are trying to reduce our dependence on coal and gas, but supply remains a challenge.

"In addition, we face constraints in hydroelectric generation due to limited water resources. Globally, many now see nuclear power as an option that must be considered.'

Fadillah the said government

government must first undertake a thorough study of nuclear technology, including engagements with the public. His visit followed Prime Minister Datuk Seri Anwar Ibrahim's official visit to the country from May 13 to May 16.
