

## PRESS RELEASE

S.A. 2023/06/23\_34 (HQ)

### TNB'S GSPARX ANNOUNCES EXCLUSIVE OFFER OF ROOFTOP SOLAR PACKAGES FOR RESIDENTIAL CUSTOMERS

Understanding the public's need for a sustainable solution for energy consumption, especially during hot weather conditions, **Tenaga Nasional Berhad (TNB)** is offering affordable and accessible solar installation packages through its wholly-owned subsidiary, GSPARX Sdn Bhd. Available at zero upfront costs, the rooftop solar offerings are tailored for residential customers, who are looking for long-term savings on their electricity bills.

A special early bird package for the first 150 customers is introduced with savings of up to RM4,999 for rooftop solar photovoltaic (PV) installations, starting today until 31st July 2023. All new packages come with free maintenance of the solar systems for two years and free solar insurance for one year. Homeowners looking to maximise their savings can choose to take up this attractive limited-time offer as it empowers them to adopt a more sustainable lifestyle.

"The affordable solar installation offer comes with a special early bird package that will enable consumers to achieve significant cost savings while encouraging sustainable energy practices. Furthermore, this demonstrates TNB's strong commitment to bolstering the Government's Net Energy Metering (NEM) 3.0 initiative," said **Dato' Indera Ir. Baharin Din, TNB President and Chief Executive Officer**.

To enhance the accessibility of its solar packages, GSPARX has partnered with financial institutions, offering customers a range of flexible financing options. These options include a 36-month interest-free instalment plan via a credit card or a financial loan with repayment periods of up to 10 years.

Through these financing options, GSPARX makes it easy for customers to become prosumers, a transformative role that offers both economic benefits and control over their energy usage. By embracing the role of prosumers, customers can take proactive measures to mitigate the impact of any hikes in their electricity costs.

With TNB's forward-thinking approach and GSPARX's innovative offerings, customers can embark on a path toward a sustainable, prudent, and greener lifestyle. By harnessing the power of solar energy, customers can effectively manage their electricity expenses while actively participating in the global effort to combat climate change and promote sustainable practices.

For more information about GSPARX's current solar rooftop offerings and financing options, visit <https://www.gsparx.com> or <https://www.tnb.com.my/solar>.
