**S.A. 2017/10/62 (HQ)**

### **TNB'S SUBSIDIARY LAUNCHES HOME ENERGY MANAGEMENT SYSTEM**

TNB Energy Services Sdn Bhd (TNBES), a wholly-owned subsidiary of Tenaga Nasional Berhad (TNB) today launched 'maevi', its online energy monitoring system which enable customers to monitor electricity bill, automate appliances and keep their home safe with maevi security features.

Maevi (Making Electricity Visible) was launched by the Minister of Energy, Green Technology and Water, Datuk Seri Panglima Dr. Maximus Johnity Ongkili in conjunction with three-day International Greentech & Eco Products Exhibition & Conference Malaysia (IGEM) 2017.

It is available as a mobile app (Android & IOS-based) and a web service. Maevi is expected to enhance awareness and encourage customers to use electricity efficiently through real time monitoring of electricity consumption, energy cost calculation of electrical appliances and notification when consumption exceed targeted bill.

The system, another beyond meter product by TNB, is a Home Energy Management System which complements the Home Energy Report (HER), an Energy Efficiency (EE) program that aims to engage and empower domestic electricity customers to manage their home energy use and save money on their monthly electricity bills.

HER utilises behavioural science and data analytics to achieve its energy efficiency objectives. It is funded by both Malaysia Electricity Supply Industry Trust Account MESITA and TNB.
