S.A. 2019/08/51 (HQ)

PREVENTIVE MAINTENANCE OF TNB MAIN SUBSTATION IN PORT KLANG ON 14 AUGUST

- 12-hour shutdown to Pulau Ketam and Sungai Lima
- portable generators to be mobilised

Tenaga Nasional Berhad (TNB) will undertake preventive maintenance of its main substation in Port Klang on Wednesday, 14th August 2019 as part of its continuous efforts to provide a reliable, secure and quality power supply.

The work to be carried out is a major power failure prevention initiative to meet the rapid development, expansion and increasing population density in Port Klang.

The maintenance will cause a 12-hour shutdown of electricity supply to Pulau Ketam and Sg Lima, affecting approximately 1,500 customers, from 7:00 am to 7:00 pm.

During the period, five portable power generators will be deployed from the mainland to the islands to support premises requiring critical power supply, for instance, Klinik Desa and premises with patients requiring medical attention such as oxygen support.

For enquiries, the affected customers are advised to contact TNB CareLine Facebook or call 1-300-88-5454.

We apologise for any inconvenience that may occur due to the preventive maintenance work.
