SEVEN MORE SPONSORS FOR CEPSI 2018

Tenaga Nasional Berhad (TNB) has clinched sponsorship deals with seven additional companies for the Conference of Electric Power Supply Industry (CEPSI 2018), making a total of 24 companies which have confirmed their support for the prestigious electricity industry event.

TNB is hosting CEPSI 2018 from 17th to 22nd September 2018, this year's most prominent electricity supply industry conference in East Asia and the Western Pacific region. Over 1,500 delegates, comprising industry leaders, senior executives, government officials and professional experts from all over the world are expected to join CEPSI 2018 in Kuala Lumpur.

TNB Chief Corporate Officer and AESIEAP Secretary General (2017/2018), Datuk Wira Roslan Ab Rahman said TNB is proud to have these companies on board as their support reaffirmed CEPSI 2018 as a must attend event for the electricity industry players.

The companies are Edra Power Holdings, one of South East Asia's leading international independent power producers (Diamond sponsor); South Korea's conglomerate, Daelim and Philippines' largest distributor of electrical power, Meralco (Platinum sponsors); and Malaysia's specialist infrastructure contractor, LLC Berhad (Silver sponsor). Trilliant, a networking expert that helps electric utilities deploy smart grid initiatives; Samsung C&T, South Korea's premier construction company; and PLN (Perusahaan Listrik Negara), Indonesia's sole power distributor and generator of the majority of the country's electricity; are the new Bronze sponsors of the conference.

"I am also pleased to announce that BMW is joining us as the exclusive electric vehicle (EV) transport partner or E-Mobility partner, providing shuttle and hospitality service for the VIPs. This type of partnership is the first of its kind for an event of similar scale in this country," added Roslan.

Themed "Reimagining Utility of the Future", the conference will discuss on the industry's response to technology disruptions, economic shifts, evolving sustainability, megatrends, the energy trilemma, digitalisation, and a smarter future for the electricity industry.
