CEPSI 2018: EXPERTS TO DELIBERATE ON WHAT'S MOVING & SHAKING ESI

The best brains of the electricity supply industry (ESI) will share insights into what's moving and shaking the industry in the upcoming Conference of the Electric Power Supply Industry (CEPSI) 2018.

Fifteen high-profile speakers will speak on five key topics during five keynote sessions of the conference, to be held from 17th to 22nd September 2018 at the Kuala Lumpur Convention Centre.

In the first keynote session, themed 'Global Trends and Big Shift in Electricity & Energy', the panelists will discuss on the myriad of trends and mega-shifts taking place in the industry and the world.

Panelists for the second session, themed 'Future Utility and Sustainable Development', will provide insight into a future utility that addresses the various emerging issues brought about by economic, regulatory and technological changes, while ensuring sustainable development.

For the third session, themed 'ESI Digitalisation and Industrial Revolution (IR) 4.0', the speakers will shed light into the various digital initiatives currently taking place in the industry.

Continuing on from the third keynote session, panelists of the fourth session, themed 'ESI Innovation & Smart Solutions Synopsis' will explore how the ESI is increasingly looking at innovation from within and outside the industry to shape, transform and progress.

The last session, themed 'Green Development & Transformation in ESI' will investigate how the ESI is managing the energy trilemma through environmental sustainability, while preserving

energy security and safeguarding energy equity by embracing green development and transformation.

Over 1,500 delegates are expected to participate in CEPSI 2018, hosted by TNB on behalf of the Association of the Electricity Supply Industry of East Asia and Western Pacific (AESIEAP).

Released in Kuala Lumpur, on 26 August 2018 at 2.15 pm
