F. EXPLANATORY NOTES

(Amounts in RM million unless otherwise stated)

1) BASIS OF PREPARATION

These unaudited condensed interim financial statements of the Group have been prepared in accordance with Financial Reporting Standards ("FRS") 134 "Interim Financial Reporting", issued by Malaysian Accounting Standards Board ("MASB") and paragraph 9.22 and Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad, and should be read in conjunction with the Group's audited financial statements for the year ended 31 August 2010.

Within the context of these financial statements, the Group comprises the Company and its subsidiaries and the Group's interest in associates and a jointly controlled entity as at 31 August 2010. The explanatory notes attached to the Interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the group since the year ended 31 August 2010.

2) AUDIT QUALIFICATION

The annual audited financial statements for the financial year ended 31 August 2010 were not subject to any qualification.

3) CHANGES IN ACCOUNTING POLICIES

The accounting policies applied are consistent with those adopted for the annual financial statements for the year ended 31 August 2010 except for the adoption of new standards, amendments to standards and IC interpretations that are mandatory for the Group with financial year beginning 1 September 2010. The adoption of those standards, amendments and interpretations do not have a material impact on the Interim financial information of the Group except for the adoption of the following standards as set out below:

(I) Adoption of new accounting policies and changes in accounting policies

(a) Presentation of Financial Statements (FRS 101)

Prior to the adoption of the revised FRS 101, the components of the financial statements presented consisted of a balance sheet, an income statement, a statement of changes in equity, a cash flow statement, and notes to the financial statement.

The adoption of FRS 101 (revised) has resulted in a change in the presentation of financial statements. The revised standard prohibits the presentation of items of income and expenses (that is 'non-owner changes in equity') in the statement of changes in equity. All 'non-owner changes in equity' are required to be shown in a statement of comprehensive income which can be presented as a single statement or two statements (comprising the income statement and statement of comprehensive income). The Group has elected to present the statement of comprehensive income in two statements.

(b) Leases (FRS 117)

The Group has adopted the amendments to FRS 117. The Group has reassessed and determined that all leasehold land of the Group which are in substance finance leases and has reclassified the leasehold land to property, plant and equipment. The change in accounting policy has been made retrospectively in accordance with the transitional provisions of the amendment.

3) CHANGES IN ACCOUNTING POLICIES (CONT'D)

(I) Adoption of new accounting policies and changes in accounting policies (cont'd)

(c) Financial Instruments: Recognition and Measurement (FRS 139)

FRS 139 sets out the new requirements for the recognition and measurement of the Group's Financial Instruments. Initially, financial instruments are recorded at fair value. Subsequent measurement of the financial instruments at the balance sheet date reflects the designation of the financial instruments.

Financial Assets:

Financial Assets are classified as financial assets at fair value through profit or loss, loans and receivables, held to maturity investments, available for sale financial assets (AFS), or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Group's financial assets include cash and short term deposits, trade and other receivables and AFS Investments.

(i) Loans and receivables

Prior to 1 September 2010, loans and receivables were stated at gross receivables less provision for doubtful debts. Under FRS 139, loans and receivables are initially measured at fair value and subsequently at amortised cost using the effective interest rate (EIR) method. Gains and losses arising from the derecognition of the loans and receivables, EIR amortisation and impairment losses are recognised in the income statement.

(ii) AFS

Prior to 1 September 2010, AFS financial assets such as investments were accounted for at cost adjusted for amortisation of premium and accretion of discount less impairment or at the lower of cost and market value, determined on an aggregate basis. Under FRS 139, AFS financial asset is measured at fair value initially and subsequently with amortisation of premium with accretion of discount and other accrual of income recognised in income statement and with unrealised gains or losses recognised as other comprehensive income in the AFS reserve until the investment is derecognised, at which time the cumulative gain or losses is recognised in the income statement or determined to be impaired, at which time the cumulative loss is recognised in the income statement and removed from the AFS reserve.

(iii) Fair Value Through Profit or Loss

Derivative financial instruments were not previously recognised in the financial statements on inception. These are now recognised and measured at fair value on the date a derivative contract is entered into and are subsequently re-measured at fair value with changes in fair value recognised in profit or loss at each reporting date.

Financial Liabilities:

Financial liabilities are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The group financial liabilities include trade and other payables, short term and long term borrowing and are carried out at amortised cost.

The Group has applied the new policies in relation to the financial instruments above in accordance with the transitional provisions in FRS 139 by recognising and re-measuring all financial assets and financial liabilities as at 1 September 2010 as appropriate. The related adjustments to the previous carrying amounts are made to the opening retained profits and available-for-sale reserves as appropriate. Comparatives are not restated. The effects of the changes are disclosed below.

3) CHANGES IN ACCOUNTING POLICIES (CONT'D)

(I) Adoption of new accounting policies and changes in accounting policies (cont'd)

(d) Transfers of Assets from Customers (IC Interpretation 18)

IC Interpretation 18 "Transfers of Assets from Customers" is effective for transfers of assets from customers on or after 1 January 2011. The IC interpretation requires that entities which receives cash from customers when that amount of cash must be used only to construct or acquire an item of property, plant and equipment and the entity must then use the item of property, plant and equipment either to connect a customer to a network or to provide the customer with ongoing access to a supply of goods or services, or to do both, the entity shall recognise the cash received as revenue.

G. ADDITIONAL INFORMATION AS REQUIRED BY PART A OF APPENDIX 9B OF THE BURSA MALAYSIA LISTING REQUIREMENTS

15) REVIEW OF PERFORMANCE

- (a) Performance of the current nine months ended 31 May 2011 (3rd Quarter FY2011) against the corresponding nine months ended 31 May 2010 (3rd Quarter FY2010):

A 2.4% or RM547.3 million improvement in revenue from RM22,450.7 million in the prevailing period was mainly due to an increase in sales of electricity in the Peninsula and SESB. The electricity demand grew by 2.8% in Peninsula and 2.6% in SESB as compared to the corresponding period last financial year.

However, operating expenses increased by 14.6% and has eroded the operating profit by RM2,150.1 million, from RM3,466.3 million, a reduction of 62.0%. Significant increase in operating expenses was mainly due to higher generation costs from utilisation of coal, oil and distillate, resulting from severe gas curtailment during the third quarter of FY 2011. The average price of coal consumed was USD103.0 per metric tonne as compared to USD85.1 per metric tonne in the corresponding period last financial year. Effectively, lower EBITDA margin was recorded, from 28.2% to 18.7%.

15) REVIEW OF PERFORMANCE (CONT'D)

- (b) Performance of the current third quarter (three months) FY2011 against the corresponding third quarter (three months) FY2010:

The quarter recorded a total revenue of RM7,768.1 million against RM7,723.3 million for the same period last financial year. The improvement was mainly from sales of electricity in Peninsular Malaysia which recorded an increase of 0.9%. The units sold also registered a growth of 1.5% in the Peninsular as compared to the corresponding period.

Severe gas curtailment during the quarter under review has led to higher utilisation of alternative fuels, namely oil and distillate. This was further worsened by the increase in the average coal price consumed from USD92.2 per metric tonne in quarter three FY2010 to USD109.2 per metric tonne in the current quarter. Hence, the quarter reported an operating loss of RM519.8 million as compared to the corresponding 3rd Quarter FY2010 operating profit of RM904.5 million.

16) MATERIAL CHANGES IN THE QUARTERLY RESULTS COMPARED TO THE PRECEDING QUARTER

- Performance of the current quarter (3rd Quarter FY2011) against the preceding quarter (2nd Quarter FY2011):

The Group reported a revenue of RM7,768.1 million for the current quarter, an increase of 3.5% as compared to the preceding quarter which reported a revenue of RM7,503.5 million.

An operating loss of RM519.8 million recorded during the quarter under review was a result of the higher fuel cost for coal, and utilisation of oil and distillate. The decision to utilise alternative fuel was crucial in meeting the demand during the gas curtailment. This has led to a Net Loss After Tax (attributable to owners of the Company) of RM440.2 million, a reduction of more than 100% as compared to a Net Profit After Tax (attributable to owners of the Company) of RM630.3 million reported in the previous quarter.

17) PROSPECTS

In line with global trends, the 1st half of 2011 saw a slowdown in the Malaysian Economy as a result of lower demand for exports. Indicators from the developed economies also seemed to suggest slower growth in the shorter term. Domestically, the contraction in Industrial Production Index shown in the month of April and May was mainly dragged down by declining output of crude oil and liquefied natural gas (LNG).

Tenaga's 3rd quarter result has been hit by higher generation cost predominantly caused by lower gas supply resulting in higher utilisation of expensive alternative fuels namely, distillate and oil. For the rest of the year, with coal prices currently trading above US\$100 per metric tonne, compounded by the higher cost of generation using oil and distillate due to continuing lower gas supply, the results for this financial year is expected to be severely affected. However, TNB will continue to strive in ensuring reliability and security of supply in meeting the demand.

The Board of Directors expects the Group's prospects for the year ending 31 August 2011 to be very challenging and that the financial results for the full year to be lower compared to the previous year.
