14) REVIEW OF PERFORMANCE

- (a) Performance of the current twelve months ended 31 August 2008 (FY2008) against the corresponding twelve months ended 31 August 2007 (FY2007):

For the twelve months ended 31 August 2008, the Group recorded total revenue of RM25,750.6 million, an increase of RM2,430.2 million or 10.4% compared to the corresponding period last financial year. This increase was mainly from higher sales of electricity which increased by RM1,806.1 million or 8.1%.

The net profit attributable to shareholders of the Company declined by 36.1% (RM1,467.1 million) to RM2,594.0 million as compared to RM4,061.1 million in the corresponding period in FY2007, mainly due to an increase in operating expenses by 22.5% (RM4,132.0 million). The major contributing factors to the increase in operating expenses were the higher capacity payments to the independent power producers and escalating energy payments as a result of the increase in coal and gas prices. The much smaller foreign exchange translation gain for the period under review was the result of lower Ringgit against the US Dollar and the Japanese Yen at 31 August 2008 compared to 1 September 2007.

- (b) Performance of the current fourth quarter (three months) FY2008 against the corresponding fourth quarter (three months) FY2007:

For the quarter, the Group recorded a total revenue of RM7,089.0 million against RM6,126.0 million for the same period last financial year, an improvement of 15.7% or RM963.0 million. The improvement was derived mainly from increase in sales of electricity in Peninsular Malaysia where the increases were RM339.7 million (14.4%) for the industrial, RM335.2 million (16.5%) for the commercial and RM102.4 million (10.7%) for the domestic sectors. The effect of the tariff revision also took effect during the quarter resulting in higher revenue for the month of August 2008, and the full impact of the tariff revision will be seen in FY2009.

Operating expenses, however, increased by 36.7% (RM1,874.4 million) thereby negating the higher revenue. The effect of the higher operating costs, notably the capacity payments and energy costs resulting from higher coal and gas prices, has drastically reduced the operating profit from RM1,202.8 million to RM259.4 million only, representing a reduction of 78.4%.

For the period under review the Group registered a net loss after tax and minority interest of RM282.9 million for the current quarter against a net gain of RM168.4 million recorded for the corresponding quarter last year, a decrease of RM451.3 million or 268.0% as a result of operating expenses increasing at a higher rate than revenue. The weakening of Ringgit against the US Dollar and Japanese Yen has also contributed to the loss.

EXPLANATORY NOTES

Economic Profit/(Loss) ("EP/(L)") is a measure of value created by a business during a single period by comparing the rate of return generated by the company against its cost of capital.

- (a) Performance of the current twelve months ended 31 August 2008 (4th Quarter FY2008) against the corresponding twelve months ended 31 August 2007 (4th Quarter FY2007):

Economic loss has increased to RM2,043.1 million from RM741.4 million; representing a greater loss of RM1,301.7 million over the corresponding period. This is attributable to a significantly higher growth in operating expenses by 22.5% (compared to 8.6% growth in the same period last year) and lower revenue growth of 10.5% (compared to 14.7% growth recorded over the same period) arising primarily from reduction in sales to EGAT. The higher growth in operating expenses was largely due to the large increase in IPP costs by 22.4% - being higher capacity and energy payments to Tanjung Bin; and other fuel-related expenses. Consequently, the EBIT* margin reduced to 11.4% compared to 20.1% over the same period last year.

- (b) Performance of the current fourth quarter FY2008 against the corresponding fourth quarter FY2007:

Economic loss has also increased to RM1,036.4 million from RM350.2 million representing a higher loss of RM686.2 million over the corresponding period. The increase is attributable to the substantial increase in operating expenses by 36.7% (compared to 11.2% growth in the same period last year) despite higher revenue growth of 15.9% (compared to 9.7% growth recorded over the same period). Similarly, the higher growth in operating expenses was largely due to IPP capacity and energy payments as well as fuel-related expenses incurred in the current quarter. Consequently, the EBIT* margin reduced to 0.2% compared to 15.4% over the same period last year.

**EBIT is defined as Operating profit adjusted for released of deferred income and other operating income.*

15) MATERIAL CHANGES IN THE QUARTERLY RESULTS COMPARED TO THE PRECEDING QUARTER

Performance of the current quarter (4th Quarter FY2008) against the preceding quarter (3rd Quarter FY2008)

Compared to the immediate preceding quarter, the Group's revenue of RM7,089.0 million was RM735.0 million higher than the preceding quarter revenue of RM6,354.0 million. This was mainly due to sales growth of 12.2% recorded in the 4th quarter against the preceding quarter, and the impact of the tariff revision effective from 1 July 2008 has also increased the revenue for the month of August 2008.

The operating expenses continued to escalate and for the fourth quarter expenses increased by RM1,265.0 million from RM5,719.1 million to RM6,984.1 million or 22.1% mainly as a result of the factors discussed in paragraph 14.

16) PROSPECTS FOR THE FINANCIAL YEAR 2009

The Group's performance for the financial year under review deteriorated significantly in the last 6 months when compared to the first half. This is attributable to the higher average coal prices and the weakening of the Ringgit against both the US Dollar and Japanese Yen.

Whilst the Budget 2009 which was announced on 29 August 2008 projected a GDP growth of 5.4%, the current turmoil in the global financial markets which has affected several financial institutions if prolonged may impact global demand and indirectly slowdown regional economic growth including the Malaysian economy. Consequently, the growth in electricity demand will be lower than the 6.1% achieved in FY2008.

In addition, significant challenges to TNB remain in FY2009 with the commissioning of the 1,400MW Jimah Power Plant (thereby raising capacity payments and the reserve margin from the current 40.8% to 47.0%) and rising average coal prices (compared to the average price of USD76.4/metric tonne in FY2008) which raises fuel costs and energy payments to the IPPs. Moreover, a weakened Ringgit will result in higher fuel cost, procurement cost of imported parts, equipment and services as well as increased interest cost (on the USD and Yen-denominated loans).

Given the foregoing scenario of lower electricity demand and higher operating costs which will impact the operations of the Group, the Board of Directors is of the view that the Group's financial performance for FY2009 will continue to decline. Notwithstanding, TNB is committed to providing all its customers with a reliable supply of electricity and raising the level of service excellence.

17) VARIANCE OF ACTUAL PROFIT FROM FORECAST PROFIT

This note is not applicable.

18) TAXATION and ZAKAT

Taxation and Zakat for the reporting period comprised the following:-

	Individual quarter		Cumulative	
	ended 31-Aug-08	ended 31-Aug-07	ended 31-Aug-08	ended 31-Aug-07
Income Tax:				
Current tax and zakat	101.8	(12.4)	(361.8)	(848.5)
Deferred tax (net):				
Relating to origination and reversal of temporary differences	(109.9)	(217.5)	(289.0)	(298.2)
Relating to changes in the Corporate income tax rate	2.0	40.2	226.0	448.4
Sub-total	<u>(107.9)</u>	<u>(177.3)</u>	<u>(63.0)</u>	<u>150.2</u>
Total taxation and zakat	<u>(6.1)</u>	<u>(189.7)</u>	<u>(424.8)</u>	<u>(698.3)</u>

The Group's effective tax rate of 14.0% for the period ended 31 August 2008 is lower than the Corporate income tax rate (26%) mainly due to the reversal of deferred tax arising from the reduction in the Corporate income tax rate and income not subject to tax (for example consumer contribution, capital gain on disposal of assets and foreign sourced income). Excluding the impact of the Deferred Tax reversal, the Group's effective tax rate is 21.5%.

The Corporate income tax rate for the Year of Assessment (YA) 2008 is 26%.

The Corporate income tax rate for YA 2009 will be reduced to 25%.

19) PROFIT/(LOSS) ON SALE OF INVESTMENTS

There were no disposals of any investments during the reporting period.

23) OFF BALANCE SHEET FINANCIAL INSTRUMENTS

TNB has certain financial instruments including assets and liabilities incurred in the normal course of business. As part of its risk management's strategy, the Company manages its exposure to market rate movements of its financial liabilities through the use of derivative financial instruments. Virtually all foreign currency contracts are denominated in US Dollar and Japanese Yen.

TNB has entered into cross currency and interest rate swap agreements as well as currency option agreements, which mature from year 2010 to 2034. TNB has entered into these derivatives to reduce its exposure to losses resulting from adverse fluctuations in interest rates or foreign currency exchange rates on underlying debt instruments.

The details and the financial effects of the derivative financial instruments that TNB has entered into are substantially described in note 29 to the financial statements of TNB for the financial year ended 31 August 2007 (pages 53-55 of TNB's Annual Report).

There have been no material changes to the derivative financial instruments described therein between 31 October 2007 (being the date of financial statements) and the date of this announcement.

As at 9 October 2008, the outstanding notional principal amount of derivative financial instruments entered into by the Group was RM1,010.3 million. While this amount represents the total notional principal amount of outstanding off balance sheet financial instruments, it is not a measure of the extent of risks that TNB is exposed to.

All the above instruments were executed with creditworthy financial institutions and the Directors of TNB are of the view that the possibility of non-performance by these financial institutions is unlikely on the basis of their respective current financial strength.

24) MATERIAL LITIGATION

There is no pending material litigation at the date of this announcement other than those disclosed in the circular to shareholders of TNB dated 21 November 2007 and note 12 of this announcement.
