F. EXPLANATORY NOTES

(Amounts in RM million unless otherwise stated)

1) BASIS OF PREPARATION

These condensed interim financial statements of the Group have been prepared in accordance with Financial Reporting Standards ("FRS") 134 "Interim Financial Reporting", issued by Malaysian Accounting Standards Board ("MASB") and paragraph 9.22 and Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad, and should be read in conjunction with the Group's audited financial statements for the year ended 31 August 2011. The figures for the cumulative period have been audited.

Within the context of these financial statements, the Group comprises the Company and its subsidiaries and the Group's interest in associates and jointly controlled entities as at 31 August 2011. The explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the group since the year ended 31 August 2011.

2) AUDIT QUALIFICATION

The annual audited financial statements for the financial year ended 31 August 2011 were not subject to any qualification.

3) CHANGES IN ACCOUNTING POLICIES

The accounting policies applied are consistent with those adopted for the annual financial statements for the year ended 31 August 2011 except for the adoption of new standards, amendments to standards and IC interpretations that are mandatory for the Group for financial year beginning 1 September 2011.

New standards, amendments to standards and IC interpretations that are applicable to the Group effective 1 September 2011

- Amendment to FRS 2 "Group Cash-settled Share-based Payment Transactions"
- Amendment to FRS 7 "Improving Disclosures about Financial Instruments"
- IC Interpretation 4 "Determining whether an arrangement contains a lease" ('IC 4')
- IC Interpretation 14 "FRS 119 The Limit on a Defined Benefit Asset, Minimum Funding Requirements"
- IC Interpretation 19 "Extinguishing Financial Liabilities with Equity Instruments"
- Improvements to FRSs (2010)

Except for IC 4, the adoption of the following IC Interpretation and amendments to FRSs and IC Interpretations that came into effect on 1 September 2011 did not have significant impact on the condensed consolidated financial statements upon their initial application.

Adoption of new accounting policies and changes in accounting policies

The adoption of IC 4 requires the Group to identify any arrangement that does not take the legal form of a lease, but conveys a right to use an asset in return for a payment or series of payments. The interpretation provides guidance for determining whether such arrangements are, or contain, leases that should be accounted for in accordance with FRS 117 - Leases.

The Group has identified arrangements that contain leases and reported these arrangements in terms of FRS 117. The retrospective adoption of this interpretation resulted in the recognition of assets, corresponding finance lease liabilities, reallocation of non-controlling interest and restatement of lease charges, as detailed in Note 28.

15) REVIEW OF PERFORMANCE

- (a) Performance of the current year ended 31 August 2012 (4th Quarter FY2012) against the corresponding year ended 31 August 2011 (4th Quarter FY2011):

The Group recorded a 11.4% or RM3,538.7 million improvement in sales of electricity from RM30,908.2 million to RM34,446.9 million. This was mainly due to an increase in sales of electricity in the Peninsula and the tariff increase of 7.1% on 1 June 2011. The electricity demand grew by 4.3% in the Peninsula and 4.8% in Sabah as compared to the corresponding period last financial year.

Profit attributable to the owners of the Company for the period under review was RM4,197.6 million as compared to RM965.4 million in the corresponding period last year, an increase of RM3,232.2 million. The increase is mainly due to the alternate fuel cost differential compensation of RM3,154.5 million, which was recognised during the current period.

- (b) Performance of the current fourth quarter (three months) FY2012 against the corresponding fourth quarter (three months) FY2011:

The quarter recorded sales of electricity of RM9,041.8 million against RM8,448.0 million for the same period last financial year. The improvement was mainly from sales of electricity in the Peninsula and Sabah which recorded an increase of 7.0% and 14.8% respectively. This was mainly contributed by the increase in tariff in the Peninsula of 7.1% and Sabah of 14.7%. The units sold also registered a growth of 4.6% in the Peninsula and 2.2% in Sabah as compared to the corresponding period.

The strengthening of Ringgit Malaysia against the Japanese Yen during the quarter under review resulted in a translation gain of RM93.0 million as compared to a loss of RM334.6 million in the corresponding quarter.

16) MATERIAL CHANGES IN THE QUARTERLY RESULTS COMPARED TO THE PRECEDING QUARTER

Performance of the current quarter (4th Quarter FY2012) against the preceding quarter (3rd Quarter FY2012):

The sales of electricity increased by RM444.1 million from RM8,597.7 million to RM9,041.8 million during the quarter under review, as compared to the preceding quarter. The operating expenses were higher as compared to the preceding quarter mainly due to the alternate fuel cost differential compensation amounting to RM1,145.2 million recognised previously in relation to the period from September 2011 to May 2012.

The quarter also recorded a foreign translation gain of RM93.0 million as compared to a loss of RM533.1 million in the preceding quarter, mainly due to the weakening of the Ringgit Malaysia against the US Dollar and Japanese Yen in Q3 FY2012.

17) PROSPECTS

At the recent 2013 Budget announcement, the Government has emphasized the commitment in ensuring the nation's economic growth continues to flourish despite uncertainties and challenges in the global economy. The forecasted GDP of 4.5% - 5.5% for 2013 is expected to be driven by the growing vibrancy in domestic investment particularly with the implementation of the Economic Transformation Programme.

The power industry is also expected to benefit from the Government's initiative to make Malaysia into a global integrated trading hub for oil and gas. This may result in a more stable supply of fuel and assist TNB to better manage its fuel security.

However, the volatility in the global economy especially in Europe and the United States coupled with the slowdown in the China economy could have an impact to the growth in electricity demand. In addition, the uncertainties in fuel pricing may affect TNB's performance.

Given the foregoing scenario, the Board of Directors expects the Group's performance for the financial year 2013 to be challenging.

18) PROFIT FROM OPERATIONS

The following items have been charged/(credited) in arriving at the profit from operations:
