

TNB ENVIRONMENTAL POLICY

Tenaga Nasional is committed to protect and reduce our environmental impact in providing sustainable energy solutions.

Through our environmental policy, we commit to reduce emissions as guided by TNB Energy Transition Plan, adopt climate change mitigation and adaptation measures to safeguard the environment, optimise the utilisation of natural resources through effective conservation and preservation of water and biodiversity management and protect environment ecosystem through effective circular economy and proactive prevention of waste and pollution.

It is the responsibility of all our employees and stakeholders to adhere to this policy at all times.

Policy Standards

- Raise environmental awareness among internal and external stakeholders including contractors and suppliers to promote adoption of sustainable environmental practices through transparent communication, active engagement, and collaboration.
- Implement and continually improve Health, Safety and Environment Management System (HSEMS).
- Develop innovative technologies for environmental management.
- Monitor environmental performance regularly to ensure ongoing compliance and continuous improvement.
- Ensure transparent and timely reporting on our environmental performance, ensuring accountability and clarity in our sustainability efforts.
- Engage with stakeholders on environmental matters regularly to realise opportunities for environmental preservation.
- Comply with all environmental acts, regulations and other obligations related to its activities and operations to prevent untoward environmental incident.

We are committed to continuously improve our environmental performance in line with TNB's aspiration.

"BETTER. BRIGHTER."

A handwritten signature in black ink, appearing to read "Baharin bin Din".

Dato' Seri Ir. Baharin bin Din
President/Chief Executive Officer
